SKILLS

- Python (FastAPI, Streamlit, scikit-learn)
- PHP (Laravel), JavaScript, HTML, CSS
- MySQL, SQLite, InfluxDB
- C, C#
- AWS, Terraform, Kubernetes, Docker
- MQTT, IoT & Embedded Systems (Raspberry Pi)
- Communication, Teamwork, Responsibility
- Adaptability, Problem-Solving

ORGANIZATIONS

Youth Club SKC
02/2025 – Present | Kragujevac, Serbia
Member of Youth Club. Actively involved in student cultural activities, events, and community initiatives.

High School Student Organization SOPČE
04/2017 – 06/2019 | Kragujevac, Serbia
Member of the Media Team. Handled promotion and coordination of various school projects and activities.

PROFILE

Recently graduated Software Engineer (Faculty of Engineering, Kragujevac) with hands-on experience across full-stack web development, IoT/embedded systems, and AI-assisted automation, built through freelance client work and personal projects. Comfortable owning a problem end-to-end — from database design to deployment. Fast learner, responsible, communicative, and adaptable, with a growing focus on backend systems and applied AI.

PROFESSIONAL EXPERIENCE

Freelance Software Engineer

07/2025 – 06/2026 | Remote

- Built an IoT proof of concept for a Dutch energy-tech client's neighborhood energy-orchestration platform, covering both the Raspberry Pi edge-device software and the cloud orchestration backend. The work was part of an innovation project supported by the European Regional Development Fund (EFRO) in the Netherlands. (03/2026 - 06/2026)
- Delivered GR Centric, a full-stack GRC platform, as part of a two-person team — owned the backend, database, and AI document-intelligence pipeline; shipped an MVP the client began promoting to customers. (07/2025 – 12/2025)

IT Support — Eurobank Direktna

12/2023 – 03/2025 | Kragujevac, Serbia

Supported internal teams with day-to-day technical issues, software installation, and system troubleshooting. Helped maintain smooth operation of workstations, printers, and internal banking systems. Collaborated with senior IT staff to assist in network diagnostics and user support.

Internship — Comtrade – EDIT

07/2023 – 07/2023 | Kragujevac, Serbia

Collaborated in a team to design and deploy a cloud-native application as part of a two-week internship program.

EDUCATION

Software Engineering — Faculty of Engineering

10/2019 – 09/2026 | Kragujevac, Serbia

Specialized Program in Mathematics — First Kragujevac Gymnasium

09/2013 – 06/2019 | Kragujevac, Serbia

PROJECTS

Neighborhood Energy Orchestrator — IoT Proof of Concept (2026)

Smart-grid proof of concept for a Dutch energy-tech client that coordinates solar panels, batteries, EV chargers, and heat pumps at the neighborhood level to reduce grid congestion. Built the Raspberry Pi 4 edge software and a FastAPI cloud orchestrator with a simulation engine and live weather/energy-price data feeds.

GR Centric — GRC Platform (2025)

Full-stack compliance-automation platform (PHP/Laravel, MySQL) built with a two-person team. Owned the backend, database, and a Python AI pipeline that extracts security controls from uploaded framework documents and generates LLM-based summaries.

Music Recommendation System (2025)

Interactive song recommender (Python, Streamlit, scikit-learn) using KNN and cosine similarity over audio features, with PCA visualization of results.

Travel Agency (2023)

Web application (PHP/Laravel) enabling quick and easy search of summer

vacation destinations across all continents, with reservations and email notifications.
